

# Postgres Plus® Oracle Compatibility

Compatibility | Performance | Scalability

## Postgres Plus Advanced Server

combines the innovation and low cost of open source with the programming power and high performance features of leading commercial databases. Offload reporting, perform replication, and create new applications using your staff's existing skills with no license fees and dramatically reduced maintenance costs with the only Oracle compatible open source database today.

Discover what **IBM, Netezza, NTT, Sony,** and many other organizations already know and use – Oracle compatibility reduces costs and improve profits!

**“With EnterpriseDB, 80 to 90 percent of our applications don’t need to be rewritten.”**

David Manifold,  
Director of Database Services,  
Sony Online Entertainment

## PRODUCT HIGHLIGHTS

### Compatibility

Advanced Server’s Oracle compatibility works on multiple levels including SQL extensions, PL/SQL, API support, tools, and one click migration capability.

### Performance

Lightning fast OLTP plus a comprehensive toolkit of performance enhancing features make Advanced Server second to none in open source database performance.

### Scalability

Horizontally scalable Infinite Cache (data cache) and GridSQL (data storage) ensure consistent and affordable performance as your application and data needs grow.

### Affordability

A small reduction in licenses can mean big savings. Right-size your license costs now with the only Oracle compatible open source database available today.

## Postgres Plus Advanced Server's Oracle compatibility:

### Slashes Costs

Dramatically reduce your IT spend by deploying new applications or migrating non-mission critical applications to the only Oracle compatible open source based database.

### Leverages Existing Skills

Deliver new database applications on open source technology without re-training your team and without changing your processes or overhauling your systems.

### Evolves Confidently

Leverage world-class open source database solutions today with the assurances of commercial warranties, indemnification, automatic update notification, 24/7 support, expert consulting and training services.

## Key Features

- Enterprise grade installer and updates manager
- PL/SQL support for Triggers, Stored Procedures, Functions and Packages
- High Performance tools: EDB\*Loader, EDB\*Plus, EDB\*Wrap and EDB\*Package
- Infinite Cache (distributed database-in-memory cache)
- GridSQL (distributed data with parallel query)
- Database Links
- Asynchronous Pre-Fetch for RAID devices
- Query Profiler
- Query Optimizer Hints
- DRITA (Reveals runtime wait states)
- Object Type support
- Explicit Transaction Control
- Bulk Data Collection and Binding

Oracle Migration support for:	SQL Extensions Compatibility	PL/SQL Compatibility	Tools Compatibility
<ul style="list-style-type: none"> <li>– Schema</li> <li>– Sequences</li> <li>– Synonyms</li> <li>– Data</li> <li>– Indices</li> <li>– Partitions</li> <li>– Database Links</li> <li>– Packages</li> <li>– Triggers</li> <li>– Stored Procedures</li> <li>– Functions</li> <li>– Users</li> <li>– Roles</li> </ul>	<ul style="list-style-type: none"> <li>– Data types</li> <li>– Functions</li> <li>– Variables</li> <li>– Column Aliasing</li> <li>– Public Synonyms</li> <li>– Sequences</li> <li>– Query Optimizer Hints</li> <li>– DUAL table</li> <li>– ROWNUM</li> <li>– DECODE()</li> <li>– Wait Events</li> <li>– Syntax</li> <li>– More...</li> </ul>	<ul style="list-style-type: none"> <li>– Block Structure</li> <li>– 10 Built-In Packages</li> <li>– Custom Packages</li> <li>– Stored Procedures</li> <li>– Functions</li> <li>– Triggers</li> <li>– Hierarchical Queries</li> <li>– Anonymous blocks</li> <li>– User Object Types</li> <li>– Explicit Transaction Control</li> <li>– Database Links</li> </ul>	<ul style="list-style-type: none"> <li>– Migration Studio</li> <li>– Database Browser</li> <li>– Oracle Dictionary Views (46)</li> <li>– EDB*Loader</li> <li>– EDB*Plus</li> <li>– EDB*Wrap</li> <li>– EDB*Package (10)</li> <li>– PL/SQL Debugger</li> <li>– Oracle Replication Server and Console</li> </ul>
